To students, faculty and staff

Tentative Restrictions on University activities due to a confirmed case of the COID-19 in our university.

President Kazuhiko Terashima

Today, a student of our university (living in the city) was found to be infected with the COVID-19.

In this situation, the University has decided to implement the following measures, according to our policy issues on August 18, "Restrictions on university activities in case a faculty/staff member or a student is found infected with COVID-19".

Because of the lack of a clear pathway of the infection and the potential for the spread of infection on campus, we will restrict university activities as the following note instead of the current university's standard of activity restrictions.

The period of the restrictions will be based on the behavioral history of the student in question, the public health center's investigation of the person with whom the student has been in close contact

The period of the restrictions: April 28 (Wednesday) - April 30 (Friday)

If, as a result of the investigation, it is determined that there is no risk of the spread of the infection, we will return to the current university's standard of activity restrictions, and resume our educational and research activities from, then Thursday, May 6.
