

学生・教職員 各位

学長 寺嶋 一彦

【注意喚起】新型コロナウイルス感染症対策の徹底及び嚴重警戒について

新型コロナウイルス感染症の新規感染者数は7月に入って再拡大に転じ、多くの都道府県で連日前週の同じ曜日を超える感染者の発生が報告されています。これについて厚生労働省は、これまで主流だったオミクロン株「BA.2」から、感染力が強いとされる「BA.5」と呼ばれる変異ウイルスに急速に置き換わっていることが背景にあるとのコメントを発表しています。また、「新たな局面（第7波）に入った」との知事や専門家の発言もあり、感染予防に対するより一層の注意が必要です。

豊橋市の感染者数も7月7日以降、連日100名を超えて増加傾向にあり、学内においても昨今感染者の報告が目立ち始めてきていることから、今後の感染者の増加が危惧されます。

については、感染力が強い変異ウイルスにより、これまで以上に感染しやすくなっていることを念頭に、あらためて下記に示す基本的な感染対策を徹底願います。

なお、暑い季節を迎え熱中症対策も重要です。5月に厚生労働省から熱中症予防の観点から屋内外でのマスクの着用について方針が示されすでにお知らせしたところですが、マスクを外せる場面等についてあらためて確認のうえ適切に対応願います。

記

◆基本的な感染対策

- (1) 「三つの密」(①密閉空間、②密集場所、③密接場面)の回避、
 (2) 人と人との距離の確保、(3) マスクの着用※、(4) 手洗い、(5) 換気

July 13, 2022

To all faculty staff members and students

President Kazuhiko Terashima

[Call for attention]
**Thorough Implementation of Countermeasures to Prevent
the Spread of COVID-19 infection and high alert.**

The number of new cases of COVID-19 infection began to spread again in July, many prefectures report more cases than the same day of the previous week every day. The Ministry of Health, Labor and Welfare (MHLW) has commented that this is due to the rapid replacement of the Omicron variant "BA.2," which had been the mainstream variant, with a mutated virus called "BA.5," which is said to have stronger infectious power. In addition, the governor and some experts have stated that "we have entered a new phase (the seventh wave)," and more attention to infection prevention is required.

The number of infected people in Toyohashi City has been on the increase, exceeding 100 every day since July 7, and reports of infected people on campus have recently begun to stand out, so there is concern that the number of infected people will increase.

Therefore, please take basic precautionary measures to prevent the spread of COVID-19 infection as below, bearing in mind that the highly contagious mutated virus has made it easier than ever to become infected.

With the hot weather, it is important to take measures to prevent heat stroke. As previously announced, MHLW announced a policy on the wearing of masks outdoors and indoors to prevent heat stroke in May. Please check again about situations in which you can remove your mask and take appropriate measures.

◆Basic precautionary measures to prevent the spread of COVID-19.

- Avoid the 3Cs
(Closed spaces, Crowded places, and Close-contact settings.)
- Keep physical distance from others
- Wear your mask properly. (※)
- Wash your hands.
- Ventilate frequently.
