Countermeasures against infectious diseases related to the new Coronavirus

## **Toyohashi University of Technology's With Corona Declaration**

At Toyohashi University of Technology, we will endeavor to prevent infections after the second wave based on our experience of countermeasures against new coronavirus infections in the first wave. For the post-corona society of the future, we aim to further improve the quality of education, research, regional contribution, international exchange, student support, and campus life by reforming the university's administrative system based on the understanding and practice of a "New Lifestyle".

### **Activity Policy**

1. Continuation and routine use of infectious disease measures
  - Thorough understanding and practice of the "New Lifestyle" in all university activities
  - Flexible curriculum and examination schedule
  - Proactive financial support for students in need
  - Continue holding of countermeasure meetings to understand the current situation and respond quickly to new coronavirus
  
2. Development of business continuity system for infectious diseases to new business promotion system
  - Promotion of working at home and enhancement of telework
  - Promotion of online lectures and meetings and the optimal combination of face-to-face meetings
  - Improve efficiency of office work by utilizing IT
  - Effective use of remote and semi-remote facilities through the use of sensors, IoT/AI and robots in research and education facilities
  - Preventing the digital divide for students, faculty and staff and supporting education
  
3. Contribution of the University's Knowledge to Society
  - Promote and support research on countermeasures against new coronavirus infection
  - Active cooperation and support for measures against coronavirus infectious diseases in the government and the region
