TOYOHASHI
UNIVERSITY OF TECHNOLOGY

Welcome to Toyohashi University of Technology

Message from the President

Master
technology,
Create
technology

Technology is the science of pursuing the principles and laws for creating things and designing systems. I want all of our students to learn and master everything from the basics to the application of creating things, systems and institutions by studying technology in a variety of fields. However, things are not created by hands and machines moving autonomously. These hands can only perform cleverly because they have a brain that gives them instructions. Let's improve technology one step or more at a time by exploring how our brains can be best utilized to useful technology and a healthy planet.

大西 隆
Dr. Takashi Onishi
President

Why study at TUT?

Here are some good reasons to choose TUT ...

Top National University

Only TUT and 13 other universities qualified for all three large Japanese government funded programs

- Cutting edge of world-leading research university
- Extra ordinal Ph.D. graduate school program
- Top Global University leading internationalization of Japanese higher education

An Education System Focused on Postgraduate Education and Research

- An integrated undergraduate and postgraduate education as reflected in the roughly equivalent balance of students in the undergraduate program and the graduate school's master's program
- More than sufficient faculty to meet the needs of postgraduate education: the student-faculty ratio is considerably smaller when compared to other universities
- Highly intensive and productive small-group instruction

Top-class Environment

- Only university in the world having on-campus entire semiconductor device prototyping facility
- A world-class interdisciplinary research center and innovative centers for research within the university campus
- Various international student support programs for academic skills development and career education
- An overseas education base located in Penang, Malaysia

Affordable Costs

- Inexpensive tuition – 535,800 JPY per year
- Japanese government scholarship, university programs like tuition exemptions, and more than 100 privately-funded scholarships available
- Low cost of living and convenient access to key locations throughout Japan from Toyohashi

TUT in Brief

Founded in 1976

ACADEMIC DEPARTMENTS: 5

STUDENTS: 2,088

- Undergraduate, 1,162

- Graduate, 926

- International students, 193
(9% of the total students)

-Asia, 165

-Central and South America, 3

-Europe, 7

-Middle East, 7

-Africa, 11

FACULTY: 226

Partner institutions: 79

worldwide with 28 countries

CAMPUS SIZE: 355,606 m² (88 acres)

as of May 2017

University seal

Communication mark

Mechanical Engineering

- Mechanical Systems Design Course
- Materials and Manufacturing Course
- System Control and Robotics Course
- Environment and Energy Course

Student message

I was a double degree student of the University of Stuttgart and Toyohashi University of Technology in my master's program. After finishing my master, I returned to TUT as a doctoral student. My research field is control engineering and optimization. Right now, I am doing path planning for a mobile robot with a genetic algorithm with respect to energy consumption as well as designing a controller for the robot. In Japan I write more reports and have more presentations during the courses while in Germany the courses focus more about the exam at the end. Hence, I gained more confidence in writing reports and presenting, especially in English. Furthermore, in Japan I am more self-dependent in my research, this helped me to be more autodidact in solving problems in research and social life. If you have the chance to go to another country for your studies you should do it. Japan is a fascinating country with a very interesting culture and will provide you with an unforgettable experience.

Tobias Rainer Schaeffe from Germany
International Doctoral Degree Program

Environmental and Life Sciences

- Sustainable Development Course
- Life and Materials Science Course

Student message

I enrolled in TUT as a first-grade student of the Undergraduate Program. When I was a first-grade student, I had opportunity to try all of the subjects so that I could consider which department I want to major in. I decided to major in Environmental and Life Sciences because I am interested in Organic Chemistry as nowadays, Organic Chemistry takes a very important role in our life. With time and experiences I've had in TUT, I feel that I have grown more than before. Before, because of the lack of Japanese, I couldn't express my thoughts in a natural way when I communicated with other Japanese students but now I can do better. In the future, I want to do a job which I can enjoy and be successful. I want to visit many places, not only Japan or Vietnam but also other countries in the world to make the relationship among countries better.

Vu Thi Hang from Vietnam
Undergraduate Program

Electrical and Electronic Information Engineering

- Electronic Materials Course
- Electrical Systems Course
- Integrated Electronics Course
- Information and Communication System Course

Student message

I'm currently studying electrical systems which develop technology to create, transport, store, maintain and utilize the next generation of electrical energy. I am a member of a laboratory which develops new measurement techniques based on electrical engineering, then designs and assembles the measurement equipment themselves. Information processes like signal and image processing are carried out as well. The output of the research is applicable to fields such as medical, electric power, environmental and many more. I think I've grown as a person through my studies in TUT. I've become better at communicating with people of different backgrounds because there are many other international students in TUT and now I've become less afraid or shy to go and talk in front of many people. TUT is the best place to study because not only the facilities are top-notch, the environment is also great if you want to focus on studying. Also, in your spare time you can experience Japan's fascinating culture and traditions.

Nur Sabihah Binti Mustafa
from Malaysia
Master's Program

Architecture and Civil Engineering

- Architecture and Building Science Course
- Civil and Environmental Engineering Course

Student message

What has been striking to me most about TUT is the novel research conducted in various departments including that in the Architecture and Civil Engineering department where I belong. The state of the art laboratory facilities equipped with the latest equipment allows the fusion of theoretical knowledge to practice. Professors have been friendly, always willing to assist in the scientific process, which makes lectures more engaging thereby fostering creativity among students even when faced with inevitable research challenges in the Laboratory. For prospective students, I encourage you to join this wonderful University. You will find several student clubs such as Badminton, Kendo and others. This offers a wonderful opportunity to experience a different culture, foster enduring relationships with both international and Japanese students. The university also has great facilities including the newly designed space at the main library which enhances the reading experience. In addition, a warm reception from the staff at international affairs division awaits you, in case you need assistance while at this awesome university.

Mbabazi James from Uganda
International Doctoral Degree Program

Computer Science and Engineering

- Computer and Information Science Course
- Information and Systems Science Course

Student message

I am happy to be a lab member working on computer vision and image processing. This is because my supervisor is really nice and takes care of my study and research. Currently, I am focusing my research on real time 3-D reconstruction. 3-D scene reconstruction is always been an interesting topic to me. The reason behind this is that when we view 2-D images, we lose some information, like depth for example. This could lead to a significant problem in the case of an emergency image analysis. For example, in rescue activities after a great natural disaster. Prospective students who want to study at TUT, can definitely choose TUT. TUT is located in a naturally beautified area, it feels like home here. Before coming to Japan, I recommend future students to learn something about Japanese culture and some basic Japanese communication. This will make your stay in Japan much easier.

Md. Mehedi Hasan from Bangladesh
International Master's Degree Program

Institute of Liberal Arts and Science

This institute is responsible for the liberal arts (humanities, social sciences and natural sciences), physical and health education, and foreign languages. It aims to provide an indispensable education and cultivate engineers who will be active on the international stage.

Electronics-Inspired Interdisciplinary Research Institute (EIIRIS)

EIIRIS was established in 2010 with the aim of being an interdisciplinary research institute. With cooperation from researchers and students in multiple fields, this institute is engaged in a myriad of research projects, including novel electronic devices/system using wide-gap semiconductors and ferroelectrics, robotics engineering, investigations of various parasitic microorganisms, cutting-edge neuroscience studies, and brain science.

Venture Business Laboratory

The LSI Factory is one of the top facilities in the world for engaging in all processes related to integrated semiconductor circuits, sensors, and microelectromechanical systems (MEMS), from design to manufacturing and operational characterization.

Joint Laboratory with world-leading institutions

Prof. Shimojo (Caltech)-TUT International Collaborative Research Laboratory

- Mind & Brain Laboratory for Perceptual and Cognitive Processing -

This laboratory is blazing trails in “the science of the mind” that lies at the foundation of a deeper understanding of humankind and society by elucidating the underlying workings of the brain and how it serves as the foundation for human reason, mutual understanding, action, and perception through neurocognitive approaches such as non-invasive brain function measurement techniques.

AIST-TUT Advanced Sensor Collaborative Research Laboratory

Advanced Sensor Devices and Fabrication Process Laboratory with Minimal Manufacturing Technology

Together with the National Institute of Advanced Industrial Science and Technology and private corporations, this laboratory is performing advanced sensor research that fuses TUT's advanced sensing device research with the idea of creating a systematic minimal manufacturing system that can create numerous kinds of devices in small quantities, where and when they are needed and in the quantities required.

Prof. Ross (MIT) - TUT Collaborative Multiferroics Research Laboratory

-Multiferroic Materials Laboratory for Advanced Applications-

In this collaborative laboratory, phase-separated multiferroic new materials and their applications are studied. The world's top-level ultra-low power consumption optical modulator based on multiferroic films with nano-structures will be developed.

Other research centers

- Center for Human-Robot Symbiosis Research
- Research Center for Agrotechnology and Biotechnology
- Research Center for Future Vehicle City
- Research Center for Collaborative Area Risk Management (CARM)
- Information and Media Center
- Cooperative Research Facility Center

Academic Programs

Undergraduate program

- Lectures in Japanese
- Admission as a 1st-year or 3rd-year student is possible

Undergraduate twinning programs with

- Hanoi University of Science and Technology (Vietnam)
- University of Science and Technology-The University of Danang (Vietnam)
- Mongolian University of Science and Technology (Mongolia)
- Malaysia Japan Higher Education Program (Malaysia)

- Lectures in Japanese
- Admission as a 3rd-year student

Graduate program (master's degree / doctoral degree)

- Lectures in Japanese

International graduate program (master's degree / doctoral degree)

- Lectures in English

International master's degree twinning programs with

- Universitas Hasanuddin (Indonesia)
- Institut Teknologi Bandung (Indonesia)
- Ho Chi Minh City University of Technology (Vietnam)
- Northeastern University (China)
- Universiti Sains Malaysia (Malaysia)

- Lectures in English

International master's double degree program with

- University of Stuttgart (Germany)
- University of Eastern Finland (Finland)

- Lectures in English

Global Technology Architects Course (GAC) Applied to all 5 departments

This comprehensive undergraduate-master's program is designed for both Japanese and international students who desire international careers.

- Lectures in Japanese / English (Bilingual)
- Admission as a 1st-year or 3rd-year student is possible
- Special Japanese language curriculum to acquire JLPT test level N1 (JLPT N1 is required for GAC certification)
- All students live in the “TUT Global House” (Multicultural Boarding House: see more details on page 11)

*“Global Technology Architects” refers to creative engineers and researchers with a high level of planning and design capabilities to tackle global issues. GAC aims to develop engineers and researchers with such capabilities.

▶ <http://www.sgu.tut.ac.jp/eng/admission/index.html>

Research students

Research students do their research under the guidance of an academic supervisor without the aim of earning credits or obtaining degrees.

Visiting students

(Special research students/Special audit students)

Visiting students do their research or study while they are continuing their study with their home university. There are two types of visiting students: “special research students” who aim to do research and “special audit students” who aim to earn credits.

How to apply

Undergraduate program / Global Technology Architects Course

- 1 Refer to the application guide**
Visit <https://www.tut.ac.jp/exam/collect.html> to find the application guide.
- 2 Check entry requirements**
Applicants must comply with all requirements.
- 3 Apply for admission**
Registration via the Internet is necessary before submitting the required documents.

Graduate program / International graduate program

- 1 Find a supervisor**
Applicants for the master's program (offered in Japanese) do not need approval from a supervisor.
- 2 Refer to the application guide**
Visit <https://www.tut.ac.jp/exam/collect.html> (graduate program) or <https://www.tut.ac.jp/english/international/> (international graduate program) to find the application guide.
- 3 Check entry requirements**
Applicants must comply with all requirements.
- 4 Apply for admission**
Registration via the Internet is necessary before submitting the required documents for the master's program (offered in Japanese).

Twinning or double degree programs

- 1 Verify your status**
- 2 Refer to the application guide**
Contact the admissions office at your university to find the application guide for the undergraduate twinning program.
Visit <https://www.tut.ac.jp/english/international/> to find the application guide for the international master's twinning or double degree program.
- 3 Contact the admissions office at your university for the program**
- 4 Check entry requirements**
Applicants must comply with all requirements.
- 5 Apply for admission**

Research students

- 1 Find a supervisor**
- 2 Refer to the application guide**
Visit <https://www.tut.ac.jp/english/international/research.html> to find the application guide.
- 3 Check entry requirements**
Applicants must comply with all requirements.
- 4 Prepare your research plan**
- 5 Apply for admission**

Visiting students (special research students/ special audit students)

- 1 Find a supervisor or contact a faculty member**
- 2 Refer to the application guide**
Visit https://www.tut.ac.jp/english/international/short_term.html to find the application guide.
- 3 Check entry requirements**
Applicants must comply with all requirements.
- 4 Apply for enrollment**

How to select a course

Explore our departments in this guide, or visit:
 ▶ <https://www.tut.ac.jp/university/subject.html> (Japanese) or
 ▶ <https://www.tut.ac.jp/english/introduction/department.html> (English)

How to find a supervisor

To get approval from a prospective supervisor, visit:
 Department information ▶ <https://www.tut.ac.jp/english/introduction/department.html>
 Faculty members list ▶ <https://www.tut.ac.jp/english/schools/faculty/>
 Proceed to make contact with the faculty member directly.

Inquiries about the admission process

- Entrance Examination Division Email: nyushi@office.tut.ac.jp TEL: +81-532-44-6527
(for undergraduate program/ graduate program/ international graduate program/ twinning program/ double degree program/Global Technology Architects Course)
- International Affairs Division Email: ryugaku@office.tut.ac.jp TEL: +81-532-44-6577
(for research students/ visiting students)

Student life

Student message

I transferred from the Kosen National Institute of Technology and entered the third year of study at the TUT Department of Environmental and Life Sciences. I am interested in medicine and pharmaceuticals and have been majoring in synthetic organic chemistry since my fourth year. There wasn't a lot of research results relating to my research topic, and I initially had difficulty with my research not going the way I wanted, but I persisted with my research and was eventually able to present my results at an academic conference.

In my everyday life, I have been greatly assisted by the International Affairs Division at TUT, whose role it is to support international students. International students have a lot to worry about, including financial problems, but the International Affairs Division publishes lots of information about scholarships and student life, and I was able to receive a scholarship in my third year, and again when I was doing my master's degree. There is also an extra-curricular club called CALL that holds many interesting events like Halloween and Christmas parties where international students can meet Japanese students. I think it is important for students to hang out with people from lots of different countries and learn about Japanese culture when they are in university.

TUT is one of the universities in Japan chosen as a research university. At TUT, students are able to foster not only their technical knowledge but also their practical skills through experiments because TUT provides an environment where students can focus on their research and utilize their excellent facilities. I was also able to gain valuable experience working at a large Japanese company on a two-month internship in my fourth year where I was able to demonstrate such abilities. In the future, I would like to further my research and use the knowledge of synthetic organic chemistry that I gained in my lab to contribute to the development of pharmaceuticals in Mongolia.

Otog Nansalma from Mongolia
Master's Program
Environmental and Life Sciences

Schedule

	6:00	7:00	8:00	9:00	10:00	11:00	12:00	13:00	14:00	15:00	16:00	17:00	18:00	19:00	20:00	21:00	22:00	23:00	24:00	1:00
Monday	Wake-up		Research		Lunch		Teaching assistant		Free time		Going to bed									
Tuesday	Wake-up		Lecture		Lunch		Research		Part-time job		Free time		Going to bed							
Wednesday	Wake-up		Research		Lunch		Research		Seminar		Working out in a gym		Free time		Going to bed					
Thursday	Wake-up		Lecture		Lunch		Research		Free time		Going to bed									
Friday	Wake-up		Research		Lunch		Self study at a library		Free time		Going to bed									
Saturday	Wake-up		Part-time job		Lunch		Free time		Phone with family and friends		Going to bed									
Sunday	Wake-up		Going to a grocery store		Lunch		Free time		Going to bed											

Events

There are many events where international students can interact with Japanese students and members of the local community. We are sure that these events and activities will leave international students with happy and lasting memories:

International Exchange Day

University Festival

Study Trip

Open Campus

▶ <http://ignite.tut.ac.jp/cir/english/event/tutday.html>

Club activities

Join our club activities! More than 45 official clubs

Sports:

baseball, soccer, tennis, surfing, triathlon, kyudo (Japanese archery), kendo (Japanese fencing), and more

Culture and Hobbies:

robocon (robot contest), tea ceremony, international exchange, jazz band, and more

Students' Union: Student council and more

▶ https://www.tut.ac.jp/english/student_life/campuslife.html

Support and services

Orientation

You will receive useful information about studying and living in Toyohashi during your first week.

Supporter system

Newly-arrived international students are assigned supporters for one year to facilitate their new lives in Japan.

▶ <http://ignite.tut.ac.jp/cir/english/students/tutor.html>

Counseling support

Faculty members who can speak both English and Japanese provide counseling and advising services for academic matters and everyday life. Counselors and doctors are also available to provide counseling and advising services for academic matters, everyday life or health issues.

▶ <http://ignite.tut.ac.jp/cir/english/students/consultation.html>

Medical and health care

Our school nurse is on call daily at the health care center in case of sickness or medical emergency. A school doctor is also available to give students advice and guidance about their physical or mental well-being.

Insurance

All international students are required to join the national health insurance program in Japan. Once insured, you pay only 30% of any incurred medical or dental costs. Our university has insurance cover for registered students in case of accidental injury occurring during classes, such as physical education as well as experiments or extracurricular activities.

Japanese language education

The Center for International Relations offers three Japanese language courses:

- Japanese Intensive Language Course I [Elementary]
- Japanese Intensive Language Course II [Pre-Intermediate]
- Basic Japanese Classes

▶ <http://ignite.tut.ac.jp/cir/english/students/program/>

Accommodation

On campus

Student dormitory

- 595 rooms are available for both international and Japanese students.
- Each room is furnished and equipped with an air conditioner/heater and LAN socket. Some rooms have their own kitchen and bathroom facilities, while others use shared facilities.

Dormitory A·B·C·D(400 rooms)	Male undergraduate students	¥7,000 / month
Dormitory E (99 rooms)	Male graduate students	¥11,000 / month
Dormitory F (96 rooms)	Female students Male graduate students	¥20,000 / month

▶ https://www.tut.ac.jp/english/student_life/ua.html

International house

- 54 rooms are available for newly arrived international students.
- Each room is furnished and equipped with an air conditioner/heater. Some rooms have their own kitchen and bathroom facilities while others use shared facilities.

Single room	¥5,900/month
Couple room	¥11,900/month
Family room	¥14,200/month

▶ https://www.tut.ac.jp/english/student_life/ua.html

TUT Global House

New global-oriented accommodation

- Unique shared-house style accommodation for international and Japanese students enrolled in the Global Technology Architects Course
- Students obtain global communication capability through the everyday life experienced there
- International students can communicate in English while they learn Japanese
- Permanently stationed house master/ resident assistants

▶ <http://www.sgu.tut.ac.jp/eng/student-life/boarding-house.html>

Off campus

Private apartments around campus

Most international students tend to live in private apartments. The rental costs of a private apartment vary according to their location and size.

Financial information

Academic fees

	Application Fee	Enrollment Fee	Tuition
Undergraduate students	17,000 yen	282,000 yen	535,800 yen/ year
Graduate students	30,000 yen	282,000 yen	535,800 yen/ year
Research students	9,800 yen	84,600 yen	356,400 yen/ year (29,700 yen/ month)
Special research students	Exempt	Exempt	356,400 yen/ year (29,700 yen/ month)
Special audit students	Exempt	Exempt	14,800 yen/ credit

In special cases, where regular students have financial difficulties in paying tuition but have shown excellent academic achievement, the university may waive the admission and the tuition fee.

According to the agreements with our partner universities, some students may be eligible to apply for a waiver of tuition and other academic fees for certain academic programs.

Special research students and special audit students coming from partner universities are exempted from tuition fees.

Scholarships

80% of our current international students are supported by scholarship; this ratio is significantly higher than other universities. Applicants may be eligible to apply for a Japanese Government (MEXT) scholarship, JICA scholarship or an Aichi scholarship. Furthermore, there are many privately-funded scholarships available for international students after enrollment in the university. Nowadays, more and more international students are obtaining scholarships from entities within their own countries.

Scholarships / Financial Support

► <http://www.tut.ac.jp/english/international/scholarship.html>

Living cost

The cost of living in Toyohashi is much lower than in Japan's larger cities. In particular, rental prices for accommodations in Toyohashi are approximately half that of Tokyo.

For your reference, here are some of the costs associated with living and studying in Toyohashi.

*Please be advised that this is an estimate only; costs vary from one individual to another.

*The table does not include clothing and medical expenses. You will also have to pay tuition and other associated academic costs.

*The Immigration Bureau of Japan has financial requirements you must meet in order to receive a student visa.

Average Monthly Cost	
Books and materials	10,000 yen
Accommodation	Dormitory: 7,000 yen- 20,000 yen International House: 5,900 yen- 14,200 yen Private apartment: 15,000 yen- 40,000 yen Deposit, Fees: depends on property
Board and Living expenses	30,000 yen
Utility (Electricity, Gas, Water)	10,000 yen
Cell Phone	8,000 yen
National Health Insurance	1,500 yen
Others	10,000 yen
Total	75,400 yen~

Schedule of Admission & Visa

Careers

Graduates from Toyohashi University of Technology are active all over the world as “practical and leading engineers”

Through unified undergraduate to graduate education, TUT trains advanced engineers equipped with outstanding skills in the technological development needed to drive industry in Japan and throughout the world.

All fourth-year undergraduate students undergo at least a two month internship in order to learn how to apply techniques and theories as well as become accustomed to life in an actual work environment. With these practical skills, 57% of international students go on to our graduate program.

After the master's degree program, 15% of international students go on to our doctoral degree program. 59% of TUT graduates gain employment in Japan immediately after graduation.

We provide active employment support for international students, such as career guidance, company information sessions, and employment lectures. Furthermore, Aichi prefecture, where Toyohashi city is located, is one of the biggest industrial areas in Japan, where there are a large number of manufacturing companies providing potential exciting career opportunities.

Our alumni move on to active careers in corporations and universities all over the world, as well as here in Japan.

Graduate message

I studied material science and researched about low cost organic solar cells at TUT. After graduating from TUT (International Master's Degree Program of Electrical and Electronic Information Engineering in 2014), I started to work at the KANEFUSA CORPORATION, which manufactures sawblades, router bits, cutters and knives. Over the course of three years, I was transferred to numerous departments and acquired a great deal of useful skills while working in Japan. Presently, I will be transferring to our company's branch in Indonesia. I would like to develop and bring the professionalism learnt in Japan into our branch operations in Indonesia.

Dear prospective international students,

Never forget your country, be an open minded person and try and experience everything!

ADRIAN ASHARI from Indonesia
KANEFUSA CORPORATION
Sales Engineer

Location

Toyohashi City is located in the southeastern corner of Aichi Prefecture, and is both the cultural and industrial center of the East Mikawa area.

Aichi is centrally located on the main Japanese island of Honshu, and is a setting where many feudal warlords have played major roles throughout history. In modern times, many companies have their headquarters in Aichi, including Toyota Motor Corporation, Nippon Sharyo (railway rolling stock manufacturer) and Noritake (tableware manufacturer).

As one of Japan's 'core cities', Toyohashi has everything you'd expect to find in a major city, but it maintains the friendliness and love of Japanese tradition that bigger cities often forget.

Toyohashi has a mild climate, a low cost of living and is within easy reach of Nagoya, Tokyo, Osaka, Kyoto and Kobe by Shinkansen bullet train.

Toyohashi also has a wonderful natural environment, surrounded by sea and mountains. This natural bounty means that there are many interesting places to visit.

The vast expanse of the Pacific Ocean is only a short bicycle ride away to the south of Toyohashi University of Technology' campus. There you will find Japan's longest beach, Omote-hama. This beach is popular for a variety of activities such as surfing, fishing and picnicking, and is also a famous spawning site for the loggerhead sea turtle. The north of the city is bordered by Mt. Ishimaki, and the hills to the east are home to popular attractions like the Toyohashi Nature Walk and Imo Bog. The powerful Toyo River flows through the city, blending with the surrounding greenery to create a beautiful landscape.

From Chubu International Airport to Toyohashi Station

Take any Meitetsu train from the airport and change trains at the stop "Jingu-mae" to a Limited Express or Rapid Limited Express train bound for Toyohashi. It takes about 20-40 minutes (depending on train) from the Airport to Jingu-mae, and about 50 minutes from Jingu-mae to Toyohashi.

From Toyohashi station to the campus

The Toyotetsu bus runs from Toyohashi Station to the campus every 10-20 minutes from 7am to 8pm. Take a bus (34, 35, 36, or 37) with destination named "Gikadai-mae," "Re-Spa Toyohashi," or "Fukushi-mura" from bus stop No. 2 at Toyohashi station, east exit.
