

TOYOHASHI
UNIVERSITY OF TECHNOLOGY

Welcome to Toyohashi University of Technology

Message from the President

Master technology,
Create technology

Japan is renowned for its manufacturing prowess. This is supported by the education and research of technological science: our university's mission. At TUT, our efforts into the education and research of technological sciences are in the hope that the benefits they create will cross into each and every corner of the globe, and by using state-of-the-art technology, contribute toward solving global issues such as energy and resource saving strategies, and reducing the emission of greenhouse gases.

The ability to think about things from a global perspective is essential for the worldwide success of engineers. At TUT, to further promote our efforts into realizing a truly global campus and becoming a first-rate engineering university open to the world, among others steps we have taken, lectures here are conducted bilingually in both English and Japanese, and the number of communal houses with living spaces shared by students of many nationalities has been increased.

大西 隆
Dr. Takashi Onishi
President

Why study at TUT?

Here are some good reasons to choose TUT ...

Top National University

Only TUT and 13 other universities qualified for all three large Japanese government funded programs

- Cutting edge of world-leading research university
- Extra ordinal Ph.D. graduate school program
- Top Global University leading internationalization of Japanese higher education

An Education System Focused on Postgraduate Education and Research

- An integrated undergraduate and postgraduate education as reflected in the roughly equivalent balance of students in the undergraduate program and the graduate school's master's program
- More than sufficient faculty to meet the needs of postgraduate education: the student-faculty ratio is considerably smaller when compared to other universities
- Highly intensive and productive small-group instruction

Top-class Environment

- Only university in the world having on-campus entire semiconductor device prototyping facility
- A world-class interdisciplinary research center and innovative centers for research within the university campus
- Various international student support programs for academic skills development and career education
- An overseas education base located in Penang, Malaysia

Affordable Costs

- Inexpensive tuition – 535,800 JPY per year
- Japanese government scholarship, university programs like tuition exemptions, and more than 100 privately-funded scholarships available
- Low cost of living and convenient access to key locations throughout Japan from Toyohashi

TUT in Brief

Founded in 1976

ACADEMIC DEPARTMENTS: 5

STUDENTS: 2,062

- Undergraduate, 1,145

- Graduate, 917

- International students, 240
(12% of the total students)

- Asia, 217

- Central and South America, 5

- Europe, 6

- Middle East, 5

- Africa, 7

FACULTY: 218

Partner institutions: 84

worldwide with 28 countries

CAMPUS SIZE: 355,606 m² (88 acres)

as of May 2018

University seal

Communication mark

Mechanical Engineering

- Mechanical Systems Design Course
- Materials and Manufacturing Course
- System Control and Robotics Course
- Environment and Energy Course

Student message

I was a double degree student of the University of Stuttgart and Toyohashi University of Technology in my master's program. After finishing my master, I returned to TUT as a doctoral student. My research field is control engineering and optimization. Right now, I am doing path planning for a mobile robot with a genetic algorithm with respect to energy consumption as well as designing a controller for the robot. In Japan I write more reports and have more presentations during the courses while in Germany the courses focus more about the exam at the end. Hence, I gained more confidence in writing reports and presenting, especially in English. Furthermore, in Japan I am more self-dependent in my research, this helped me to be more autodidact in solving problems in research and social life. If you have the chance to go to another country for your studies you should do it. Japan is a fascinating country with a very interesting culture and will provide you with an unforgettable experience.

Tobias Rainer Schaeffe from Germany
International Doctoral Degree Program

Applied Chemistry and Life Science

- Applied Chemistry Course
- Life Science Course

Student message

First half year after entered to TUT, I studied subjects, which relate to my major. However, I am currently taking subjects that give me broader knowledge such as analytic chemistry, polymer chemistry and sign language. Moreover, while taking classes in TUT, I realized that natural products based on organic chemistry is enjoyable and fascinating to study, so I would like to do research in this filed. An aspect of my school life, TUT provides me with lots of opportunities to gain a deeper understanding toward different countries' cultures by participating to in the TUT EXPO and bilingual classes. Through this event, not only international students but also Japanese students can get to know each other and exchange values. Daily life in TUT feels like a self-growth-process and lets me accept a wide range of values. In the future, I want to go back to Mongolia and do research works based on my experience and knowledge that I gained from TUT.

BATGEREL ZOLZAYA from Mongolia
Undergraduate Program

Electrical and Electronic Information Engineering

- Electronic Materials Course
- Electrical Systems Course
- Integrated Electronics Course
- Information and Communication System Course

Student message

The reason why I chose Toyohashi University of Technology (TUT) is I knew about the collaboration of USM (Malaysia) with TUT especially for research activities and student exchange. I am currently working in group of fabrication nanomaterials known as "Multiferroics" materials. The multiferroics is a single-phase material that has several properties such as electric, magnetic and elastic properties. The laboratory, which I belong to is best choice for me because it can meet my satisfaction of studying chemistry and very generous to welcome people around the world to try learning with Japanese students in English. As I said, TUT provides me an opportunity to make lots of friends from different countries through laboratory activity, attending classes and TUT EXPO (on campus festival). I feel that TUT is the best place to connect with people around the world and you are able to get many advantages especially in exchange cultures. After I graduate from TUT, I want to work in Foreign Company in Japan in fabrication of semiconductor and memory as it is much related to my research work. After several years, I want to foster and teach Malaysia students in engineering field so that there were many engineers that able to increase the product of technology in Malaysia with applying experience from TUT.

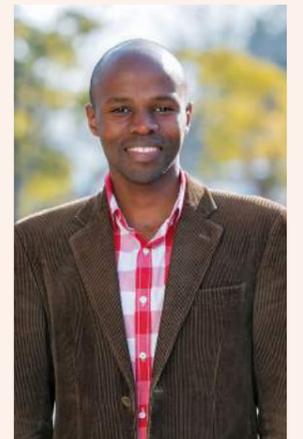

Irma Puteri Binti Shahbudin
from Malaysia
Master's Program

Architecture and Civil Engineering

- Architecture and Building Science Course
- Civil and Environmental Engineering Course

Student message

What has been striking to me most about TUT is the novel research conducted in various departments including that in the Architecture and Civil Engineering department where I belong. The state of the art laboratory facilities equipped with the latest equipment allows the fusion of theoretical knowledge to practice. Professors have been friendly, always willing to assist in the scientific process, which makes lectures more engaging thereby fostering creativity among students even when faced with inevitable research challenges in the Laboratory. For prospective students, I encourage you to join this wonderful University. You will find several student clubs such as Badminton, Kendo and others. This offers a wonderful opportunity to experience a different culture, foster enduring relationships with both international and Japanese students. The university also has great facilities including the newly designed space at the main library which enhances the reading experience. In addition, a warm reception from the staff at international affairs division awaits you, in case you need assistance while at this awesome university.

Mbabazi James from Uganda
International Doctoral Degree Program

Computer Science and Engineering

- Computer and Information Science Course
- Information and Systems Science Course

Student message

I am happy to be a lab member working on computer vision and image processing. This is because my supervisor is really nice and takes care of my study and research. Currently, I am focusing my research on real time 3-D reconstruction. 3-D scene reconstruction is always been an interesting topic to me. The reason behind this is that when we view 2-D images, we lose some information, like depth for example. This could lead to a significant problem in the case of an emergency image analysis. For example, in rescue activities after a great natural disaster. Prospective students who want to study at TUT, can definitely choose TUT. TUT is located in a naturally beautified area, it feels like home here. Before coming to Japan, I recommend future students to learn something about Japanese culture and some basic Japanese communication. This will make your stay in Japan much easier.

Md. Mehedi Hasan from Bangladesh
International Master's Degree Program

Institute of Liberal Arts and Science

This institute is responsible for the liberal arts (humanities, social sciences and natural sciences), physical and health education, and foreign languages. It aims to provide an indispensable education and cultivate engineers who will be active on the international stage.

Electronics-Inspired Interdisciplinary Research Institute (EIIRIS)

EIIRIS was established in 2010 with the aim of being an interdisciplinary research institute. With cooperation from researchers and students in multiple fields, this institute is engaged in a myriad of research projects, including novel electronic devices/system using wide-gap semiconductors and ferroelectrics, robotics engineering, investigations of various parasitic microorganisms, cutting-edge neuroscience studies, and brain science.

Venture Business Laboratory

The LSI Factory is one of the top facilities in the world for engaging in all processes related to integrated semiconductor circuits, sensors, and microelectromechanical systems (MEMS), from design to manufacturing and operational characterization.

Joint Laboratory with world-leading institutions

Prof. Shimojo (Caltech)-TUT International Collaborative Research Laboratory

- Mind & Brain Laboratory for Perceptual and Cognitive Processing -

This laboratory is blazing trails in “the science of the mind” that lies at the foundation of a deeper understanding of humankind and society by elucidating the underlying workings of the brain and how it serves as the foundation for human reason, mutual understanding, action, and perception through neurocognitive approaches such as non-invasive brain function measurement techniques.

AIST-TUT Advanced Sensor Collaborative Research Laboratory

Advanced Sensor Devices and Fabrication Process Laboratory with Minimal Manufacturing Technology

Together with the National Institute of Advanced Industrial Science and Technology and private corporations, this laboratory is performing advanced sensor research that fuses TUT's advanced sensing device research with the idea of creating a systematic minimal manufacturing system that can create numerous kinds of devices in small quantities, where and when they are needed and in the quantities required.

Prof. Ross (MIT) - TUT Collaborative Multiferroics Research Laboratory

-Multiferroic Materials Laboratory for Advanced Applications-

In this collaborative laboratory, phase-separated multiferroic new materials and their applications are studied. The world's top-level ultra-low power consumption optical modulator based on multiferroic films with nano-structures will be developed.

Other research centers

- Center for Human-Robot Symbiosis Research
- Research Center for Agrotechnology and Biotechnology
- Research Center for Future Vehicle City
- Research Center for Collaborative Area Risk Management (CARM)
- Information and Media Center
- Cooperative Research Facility Center

Academic Programs

Undergraduate program

- Lectures in Japanese
- Admission as a 1st-year or 3rd-year student is possible

Undergraduate twinning programs with

- Hanoi University of Science and Technology (Vietnam)
 - Mongolian University of Science and Technology (Mongolia)
 - DISTED College (Malaysia)
 - University of Science and Technology-The University of Danang (Vietnam)
 - Malaysia Japan Higher Education Program (Malaysia)
- Lectures in Japanese
 - Admission as a 3rd-year student

Graduate program (master's degree / doctoral degree)

- Lectures in Japanese

International graduate program (master's degree / doctoral degree)

- General program
 - Innovative Engineers Development Program through Enhancing Network between Asian Countries and Regional Industries (master's degree)
 - Global Rotation Program for Engineering Education Centered on ASEAN and African Countries (doctoral degree)
- Lectures in English

International master's degree twinning programs with

- Universitas Hasanuddin (Indonesia)
 - Ho Chi Minh City University of Technology (Vietnam)
 - Universiti Sains Malaysia (Malaysia)
 - Institut Teknologi Bandung (Indonesia)
 - Northeastern University (China)
- Lectures in English

International master's double degree program with

- University of Stuttgart (Germany)
 - University of Eastern Finland (Finland)
- Lectures in English

Global Technology Architects Course (GAC) Applied to all 5 departments

This comprehensive undergraduate-master's program is designed for both Japanese and international students who desire international careers.

- Lectures in Japanese / English (Bilingual)
- Admission as a 1st-year or 3rd-year student is possible
- Special Japanese language curriculum to acquire JLPT test level N1 (JLPT N1 is required for GAC certification)
- All students live in the “TUT Global House” (Multicultural Boarding House: see more details on page 11)

*“Global Technology Architects” refers to creative engineers and researchers with a high level of planning and design capabilities to tackle global issues. GAC aims to develop engineers and researchers with such capabilities.

▶ <http://www.sgu.tut.ac.jp/eng/admission/index.html>

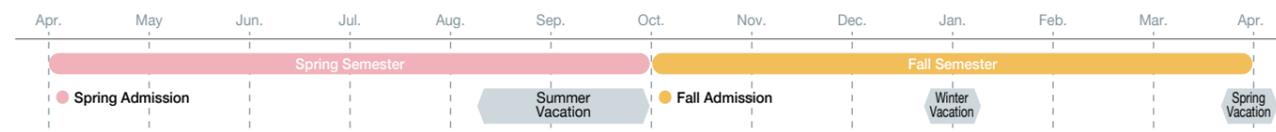

Research students

Research students do their research under the guidance of an academic supervisor without the aim of earning credits or obtaining degrees.

Visiting students

(Special research students/Special audit students)

Visiting students do their research or study while they are continuing their study with their home university. There are two types of visiting students: “special research students” who aim to do research and “special audit students” who aim to earn credits.

How to apply

Undergraduate program / Global Technology Architects Course

- 1 Refer to the application guide**
Visit <https://www.tut.ac.jp/exam/collect.html> to find the application guide.
- 2 Check entry requirements**
Applicants must comply with all requirements.
- 3 Apply for admission**
Registration via the Internet is necessary before submitting the required documents.

Graduate program / International graduate program

- 1 Find a supervisor**
Applicants for the master's program (offered in Japanese) do not need approval from a supervisor.
- 2 Refer to the application guide**
Visit <https://www.tut.ac.jp/exam/collect.html> (graduate program) or <https://www.tut.ac.jp/english/international/> (international graduate program) to find the application guide.
- 3 Check entry requirements**
Applicants must comply with all requirements.
- 4 Apply for admission**
Registration via the Internet is necessary before submitting the required documents for the master's program (offered in Japanese).

Twinning or double degree programs

- 1 Verify your status**
- 2 Refer to the application guide**
Contact the admissions office at your university to find the application guide for the undergraduate twinning program.
Visit <https://www.tut.ac.jp/english/international/> to find the application guide for the international master's twinning or double degree program.
- 3 Contact the admissions office at your university for the program**
- 4 Check entry requirements**
Applicants must comply with all requirements.
- 5 Apply for admission**

Research students

- 1 Find a supervisor**
- 2 Refer to the application guide**
Visit <https://www.tut.ac.jp/english/international/research.html> to find the application guide.
- 3 Check entry requirements**
Applicants must comply with all requirements.
- 4 Prepare your research plan**
- 5 Apply for admission**

Visiting students (special research students/ special audit students)

- 1 Find a supervisor or contact a faculty member**
- 2 Refer to the application guide**
Visit https://www.tut.ac.jp/english/international/short_term.html to find the application guide.
- 3 Check entry requirements**
Applicants must comply with all requirements.
- 4 Apply for enrollment**

How to select a course

Explore our departments in this guide, or visit:
 ▶ <https://www.tut.ac.jp/university/subject.html> (Japanese) or
 ▶ <https://www.tut.ac.jp/english/introduction/department.html> (English)

How to find a supervisor

To get approval from a prospective supervisor, visit:
 Department information ▶ <https://www.tut.ac.jp/english/introduction/department.html>
 Faculty members list ▶ <https://www.tut.ac.jp/english/schools/faculty/>
 Proceed to make contact with the faculty member directly.

Inquiries about the admission process

- Entrance Examination Division Email: nyushi@office.tut.ac.jp TEL: +81-532-44-6527
(for undergraduate program/ graduate program/ international graduate program/ twinning program/ double degree program/Global Technology Architects Course)
- International Affairs Division Email: ryugaku@office.tut.ac.jp TEL: +81-532-44-6577
(for research students/ visiting students)

Student life

Student message

I'm majoring in the integrated electronics field of electrical and electronic information engineering, which focuses on the development of opto-electronic devices, smart sensors, biosensors, MEMS, etc. My research is about designing and fabricating microelectrodes via microelectromechanical systems (MEMS) fabrication technologies for future applications in biomedical research, diagnosis and treatment through electrical stimulation, and electrophysiological signal recording.

On weekdays, about twice a week, I go to the library to study. The newly renovated library provides students a quiet place to focus and do revision, not to mention the variety of reference book genre and reading materials of each department that can be borrowed. The thing I like about TUT is the research facilities and resources that the campus provides to give the students the support they need in their research such as the renewed library. In my free time, I also participate in community volunteer work enjoying my Saturday afternoon at the Toyohashi city audiovisual education center teaching kids.

TUT is most definitely one of the top choices to further your studies after college. The university staff at the international department is incredibly helpful and friendly to talk to. You can meet many international students from all over the world.

After I graduate from TUT, I plan to work in Japan in the health science field for few years before returning to my country and applying my knowledge and experience gained from my time at TUT.

Claire King Teck Sieng from Malaysia
Master's Program
Electrical and Electronic Information Engineering

Schedule

	6:00	7:00	8:00	9:00	10:00	11:00	12:00	13:00	14:00	15:00	16:00	17:00	18:00	19:00	20:00	21:00	22:00	23:00	24:00
Monday	Wake-up	Breakfast (morning reading)	Research/Lecture	Lunch	Research/Lecture	Research/Lecture	Hang out with friends	Make dinner	Free time/Watch drama	Go to bed									
Tuesday	Wake-up	Breakfast (morning reading)	Research/Lecture	Lunch	Research/Lecture	Research/Lecture	Shop for groceries	Make dinner	Free time/Watch drama	Go to bed									
Wednesday	Wake-up	Breakfast (morning reading)	Research/Lecture	Lunch	Study in library	Research/Lecture	Hang out with friends	Make dinner	Free time/Watch drama	Go to bed									
Thursday	Wake-up	Breakfast (morning reading)	Research/Lecture	Lunch	Research/Lecture	Research/Lecture	Shop for groceries	Make dinner	Free time/Watch drama	Go to bed									
Friday	Wake-up	Breakfast (morning reading)	Research/Lecture	Lunch	Research/Lecture	Study in library	Hang out with friends	Eating out	Part-time	Free time	Go to bed								
Saturday	Wake-up	Jogging	Breakfast (morning reading)	Free time	Lunch	Free time	Volunteering	Free time	Eating out	Part-time	Free time	Go to bed							
Sunday	Wake-up	Jogging	Breakfast (morning reading)	Attend church service	Lunch	Free time	Free time	Shop for groceries	Make dinner	Video call family	Free time/Ready for new week	Go to bed							

Events

There are many events where international students can interact with Japanese students and members of the local community. We are sure that these events and activities will leave international students with happy and lasting memories:

International Exchange Day

University Festival

Study Trip

Open Campus

<http://ignite.tut.ac.jp/cir/english/>

Club activities

Join our club activities! More than 45 official clubs

Sports:

baseball, soccer, tennis, surfing, triathlon, kyudo (Japanese archery), kendo (Japanese fencing), and more

Culture and Hobbies:

robocon (robot contest), tea ceremony, international exchange, jazz band, and more

Students' Union: Student council and more

https://www.tut.ac.jp/english/student_life/campuslife.html

Support and services

Orientation

You will receive useful information about studying and living in Toyohashi during your first week.

Supporter system

Newly-arrived international students are assigned supporters for one year to facilitate their new lives in Japan.

Counseling support

Faculty members who can speak both English and Japanese provide counseling and advising services for academic matters and everyday life. Counselors and doctors are also available to provide counseling and advising services for academic matters, everyday life or health issues.

<http://ignite.tut.ac.jp/cir/english/students/consultation.html>

Medical and health care

Our school nurse is on call daily at the health care center in case of sickness or medical emergency. A school doctor is also available to give students advice and guidance about their physical or mental well-being.

Insurance

All international students are required to join the national health insurance program in Japan. Once insured, you pay only 30% of any incurred medical or dental costs. Our university has insurance cover for registered students in case of accidental injury occurring during classes, such as physical education as well as experiments or extracurricular activities.

Japanese language education

The Center for International Relations offers three Japanese language courses:

- Japanese Intensive Language Course I [Elementary]
- Japanese Intensive Language Course II [Pre-Intermediate]
- Basic Japanese Classes

<http://ignite.tut.ac.jp/cir/english/students/program/>

Accommodation

On campus

Student dormitory

- 595 rooms are available for both international and Japanese students.
- Each room is furnished and equipped with an air conditioner/heater and LAN socket. Some rooms have their own kitchen and bathroom facilities, while others use shared facilities.

Dormitory A·B·C·D(400 rooms)	Male undergraduate students	¥7,000 / month
Dormitory E (99 rooms)	Male graduate students	¥11,000 / month
Dormitory F (96 rooms)	Female students Male graduate students	¥20,000 / month

https://www.tut.ac.jp/english/student_life/ua.html

International house

- 54 rooms are available for newly arrived international students.
- Each room is furnished and equipped with an air conditioner/heater. Some rooms have their own kitchen and bathroom facilities while others use shared facilities.

Single room	¥5,900/month
Couple room	¥11,900/month
Family room	¥14,200/month

*In 2019, April, a revision of International house rent will be carried out.
https://www.tut.ac.jp/english/student_life/ua.html

TUT Global House

New global-oriented accommodation

- Unique shared-house style accommodation for international and Japanese students enrolled in the Global Technology Architects Course
- Students obtain global communication capability through the everyday life experienced there
- International students can communicate in English while they learn Japanese
- Permanently stationed house master

<http://www.sgu.tut.ac.jp/eng/student-life/>

Off campus

Private apartments around campus

Most international students tend to live in private apartments. The rental costs of a private apartment vary according to their location and size.

Financial information

Academic fees

	Application Fee	Enrollment Fee	Tuition
Undergraduate students	17,000 yen	282,000 yen	535,800 yen/ year
Graduate students	30,000 yen	282,000 yen	535,800 yen/ year
Research students	9,800 yen	84,600 yen	356,400 yen/ year (29,700 yen/ month)
Special research students	Exempt	Exempt	356,400 yen/ year (29,700 yen/ month)
Special audit students	Exempt	Exempt	14,800 yen/ credit

In special cases, where regular students have financial difficulties in paying tuition but have shown excellent academic achievement, the university may waive the admission and the tuition fee.

According to the agreements with our partner universities, some students may be eligible to apply for a waiver of tuition and other academic fees for certain academic programs.

Special research students and special audit students coming from partner universities are exempted from tuition fees.

Scholarships

80% of our current international students are supported by scholarship; this ratio is significantly higher than other universities. Applicants may be eligible to apply for a Japanese Government (MEXT) scholarship, JICA scholarship or an Aichi scholarship. Furthermore, there are many privately-funded scholarships available for international students after enrollment in the university. Nowadays, more and more international students are obtaining scholarships from entities within their own countries.

Scholarships / Financial Support

► <http://www.tut.ac.jp/english/international/scholarship.html>

Living cost

The cost of living in Toyohashi is much lower than in Japan's larger cities. In particular, rental prices for accommodations in Toyohashi are approximately half that of Tokyo.

For your reference, here are some of the costs associated with living and studying in Toyohashi.

*Please be advised that this is an estimate only; costs vary from one individual to another.

*The table does not include clothing and medical expenses. You will also have to pay tuition and other associated academic costs.

*The Immigration Bureau of Japan has financial requirements you must meet in order to receive a student visa.

Average Monthly Cost	
Books and materials	10,000 yen
Accommodation	Dormitory: 7,000 yen- 20,000 yen International House: 5,900 yen- 14,200 yen Private apartment: 15,000 yen- 40,000 yen Deposit, Fees: depends on property
Board and Living expenses	30,000 yen
Utility (Electricity, Gas, Water)	10,000 yen
Cell Phone	8,000 yen
National Health Insurance	1,500 yen
Others	10,000 yen
Total	75,400 yen~

Schedule of Admission & Visa

► http://www.tut.ac.jp/english/international/schedule_of_admission_visa.html

Careers

Graduates from Toyohashi University of Technology are active all over the world as “practical and leading engineers”

Through unified undergraduate to graduate education, TUT trains advanced engineers equipped with outstanding skills in the technological development needed to drive industry in Japan and throughout the world.

All fourth-year undergraduate students undergo at least a two month internship in order to learn how to apply techniques and theories as well as become accustomed to life in an actual work environment. With these practical skills, 47% of international students go on to our graduate program.

After the master's degree program, 12% of international students go on to our doctoral degree program. 33% of TUT graduates gain employment in Japan immediately after graduation. These ratios are reflected 2017 fiscal year data.

We provide active employment support for international students, such as career guidance, company information sessions, and employment lectures. Furthermore, Aichi prefecture, where Toyohashi city is located, is one of the biggest industrial areas in Japan, where there are a large number of manufacturing companies providing potential exciting career opportunities.

Our alumni move on to active careers in corporations and universities all over the world, as well as here in Japan.

Graduate message

I studied material science and researched about low cost organic solar cells at TUT. After graduating from TUT (International Master's Degree Program of Electrical and Electronic Information Engineering in 2014), I started to work at the KANEFUSA CORPORATION, which manufactures sawblades, router bits, cutters and knives. Over the course of three years, I was transferred to numerous departments and acquired a great deal of useful skills while working in Japan. Presently, I will be transferring to our company's branch in Indonesia. I would like to develop and bring the professionalism learnt in Japan into our branch operations in Indonesia.

Dear prospective international students,

Never forget your country, be an open minded person and try and experience everything!

ADRIAN ASHARI from Indonesia
KANEFUSA CORPORATION
Sales Engineer

Location

City data
Population: 376,478
Area: 261.86 km²
Population density: 1,438/km²
Average temperature: 16.7 °C
Hottest month: Aug., average high 32.2 °C
Coldest month: Jan., average high 8.3 °C
as of 2018

Toyohashi City is located in the southeastern corner of Aichi Prefecture, and is both the cultural and industrial center of the East Mikawa area.

Aichi is centrally located on the main Japanese island of Honshu, and is a setting where many feudal warlords have played major roles throughout history. In modern times, many companies have their headquarters in Aichi, including Toyota Motor Corporation, Nippon Sharyo (railway rolling stock manufacturer) and Noritake (tableware manufacturer).

As one of Japan's 'core cities', Toyohashi has everything you'd expect to find in a major city, but it maintains the friendliness and love of Japanese tradition that bigger cities often forget.

Toyohashi has a mild climate, a low cost of living and is within easy reach of Nagoya, Tokyo, Osaka, Kyoto and Kobe by Shinkansen bullet train.

Toyohashi also has a wonderful natural environment, surrounded by sea and mountains. This natural bounty means that there are many interesting places to visit.

The vast expanse of the Pacific Ocean is only a short bicycle ride away to the south of Toyohashi University of Technology' campus. There you will find Japan's longest beach, Omote-hama. This beach is popular for a variety of activities such as surfing, fishing and picnicking, and is also a famous spawning site for the loggerhead sea turtle. The north of the city is bordered by Mt. Ishimaki, and the hills to the east are home to popular attractions like the Toyohashi Nature Walk and Imo Bog. The powerful Toyo River flows through the city, blending with the surrounding greenery to create a beautiful landscape.

Contact and Access

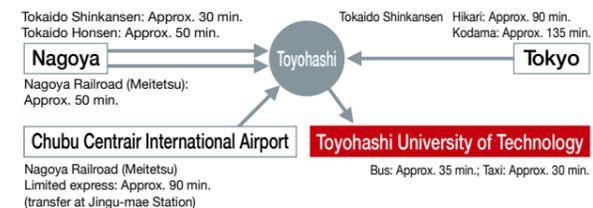

Toyohashi campus

Toyohashi University of Technology

From Chubu International Airport to Toyohashi Station

Take any Meitetsu train from the airport and change trains at the stop "Jingu-mae" to a Limited Express or Rapid Limited Express train bound for Toyohashi. It takes about 20-40 minutes (depending on train) from the Airport to Jingu-mae, and about 50 minutes from Jingu-mae to Toyohashi.

From Toyohashi station to the campus

The Toyotetsu bus runs from Toyohashi Station to the campus every 10-20 minutes from 7am to 8pm. Take a bus (34, 35, 36, or 37) with destination named "Gikadai-mae," "Re-Spa Toyohashi," or "Fukushi-mura" from bus stop No. 2 at Toyohashi station, east exit.
