

[Important] In preparation for moving <Level 2> of "Toyohashi University of Technology Activity Restrictions Level for Preventing the Spread of Corona virus".

May 20th, 2020

Countermeasures against infectious diseases related to the new Coronavirus

A nationwide state of emergency that applies to every prefecture in Japan, which was extended until May 31st, has been lifted for 39 prefectures including Aichi on May 14th, and 8 prefectures including Hokkaido, Tokyo, Osaka, etc will still remain under a state of emergency.

Although a state of emergency in Aichi has been lifted, Aichi's own state of emergency measures has been extended until May 31st. The demand for refraining from going outside continues until May 31st, and University is requested the infection prevention measures until May 31st even though business closure request was relaxed to University. The government and Aichi demand to thorough infection control like "Avoid Three Cs", "Keep a distance between people" "Wear a mask" and "Wash hands" through "New lifestyle"

COVID-19 has not got stamped out yet, so TUT decided to reconsider a content of TUT's activity restriction level for implementing the measure of preventing the spread of COVID-19 so as not to cause a second wave. TUT made a decision that Level 3 (current activity restriction) has been relaxed to Level 2.5 until the end of May for being able to move Level 2 from June 1st, after the end of a state of emergency for 8 prefectures and extension period of Aichi's own state of emergency .

- "Toyohashi University of Technology Activity Restrictions Level for Preventing the Spread of Corona virus" (May 19th :Revision)

<https://www.tut.ac.jp/docs/20200519kijyun.pdf>

※ The Activity Restrictions Level and the application starting date might be changed by the status of a state of emergency, request from Aichi prefecture and infection status. We will inform you about changes as soon as possible via web-site and e-mail.

【Class】 ~5/29

- Only distance learning by On-demand

【Class】 ~6/1

- While using distance learning actively, face to face classes and exercise and practical training are conducted by limiting the number of students with keeping mind “New lifestyle”.

- During May, the demand for refrain from traveling across the prefectures is continuing, so TUT plans to start face to face classes etc after June 15th taking into consideration of movement of students from outside of Aichi to Toyohashi (including 14 days staying at home after coming back to Toyohashi).

【Research activity with students at laboratory、 Faculty member's research activity】 and 【Faculty member's research activity and activity at laboratory and Center】 ~5/29

- Activity is basically prohibited on-campus. Work from home actively, and activity is continued through online.
- However there is a case in which it's allowed for doing activity on-campus with keeping mind “New lifestyle” if necessary. <Notification system>

【Research activity with students at laboratory、 Faculty member's research activity】 and 【Faculty member's research activity and activity at laboratory and Center】 6/1~

- Work from home actively, and activity is continued through online.
- However there is a case in which it's allowed for doing activity on-campus with keeping mind “New lifestyle” if necessary. < Notification system>
